

MONTHLY TIP

SEPTEMBER 2019

IDLING IS FUELISH!

WHAT?

It is estimated that over 3 billion gallons of fuel in the US are wasted each year while idling. Idling is more than "fuelish," it's also unhealthy. Exhaust emissions are known to worsen asthma, bronchitis, and allergies.

Idling Wastes Fuel and \$

HOW?

When you come to a stop and place your car in park, turn your engine off immediately. As a reminder, it is also illegal in the state of New Jersey to idle for more than three minutes.
